All six physicians provide services specializing in men and women's HRT, metabolic medicine and general functional health. Their licence #'s can be obtained for submission to an insurance representative by contacting the office however, they will not be published online.

Pertaining to "**Blood Spot and/or Saliva Analysis**" these formats of testing reflect the bioavailability (defined as present at the cellular level) of hormone components. These are appropriately selected after client assessment and are tested through a **CLIA Certified Diagnostic Laboratory that meets Federal Regulations**. A prescription is provided by the MD for selected testing.

We trust this has been helpful, respectfully, The WellNurtureMD Team!
